PROFESSIONAL SUMMARY

Aspiring Cloud and Cybersecurity Engineer with hands-on experience in Linux administration, network security, intrusion detection systems, and security monitoring. Skilled in Python, Bash scripting, vulnerability assessment, and threat detection. Seeking opportunities in Cloud Security, Cloud Engineering, Linux Administration, and Cybersecurity.

TECHNICAL SKILLS

- **Cloud Computing & Cybersecurity:** AWS Cloud Fundamentals, AWS Management Console, Identity and Access Management (IAM), Network Security, Cryptography, Intrusion Detection Systems (IDS), Threat Detection, Vulnerability Assessment, Security Monitoring
- **Linux & System Administration:** Linux (Ubuntu, Kali Linux), Linux CLI, Bash Scripting, SSH, User & Group Management, Package Management, Cron Jobs, Log Analysis, System Monitoring
- **Security & Networking Tools:** Wireshark, Nmap, TCP/IP, Network Traffic Analysis
- **Programming & Scripting:** Python, Bash, Java, C
- **Version Control & Development Tools:** Git, GitHub, VS Code
- **Web & Databases:** HTML, CSS, JavaScript, MySQL, SQLite

PROJECTS

Rothschild-NIDS | Network Intrusion Detection System

- Developed a real-time Network Intrusion Detection System using Flask, Scikit-learn, and SQLite.
- Built a machine learning pipeline that processed over 10,000 network records for traffic classification.

AI-Based Phishing URL Detection System

- Developed a phishing URL detection system achieving 95% detection accuracy using logistic Regression.
- Implemented URL feature extraction, preprocessing, and threat prediction mechanisms.

EXPERIENCE

InAmigos Foundation – AI Web Development

May-2026

- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, and React.js.
- Designed and implemented interactive user interfaces, ensuring seamless functionality and enhanced user experience.

TATA – Cyber Security Analyst Virtual Job Simulation

April-2026

- Conducted IAM assessment and analyzed cybersecurity risks in a simulated enterprise environment.
- Evaluated security policies, access controls, and cybersecurity best practices.

EDUCATION

B.Tech in Computer Science and Engineering

Avanthi's St. Theresa Institute of Engineering & Technology

2023 – 2027 | CGPA: 7.53

Relevant Coursework: Operating Systems, Computer Networks, Cybersecurity Fundamentals, Database Management Systems, Cloud Computing

CERTIFICATIONS

- Cryptography and Network Security (Elite) — NPTEL
- Introduction to Critical Infrastructure Protection — OPSWAT
- Cybersecurity Job Ready Certification (86%) — Certigo
- API Development: Framework Security — Infosys
- Python Basics for Data Science — IBM

ACHIVEMENTS

- Developed Communication & Leadership Skills as an active member of Toast-Masters International Club
- 1st Prize- College Hackathon, College Website Development (ATOS-2025)
- 1st Prize- PRAGYAN 2K26 Hackathon, Sudoko Solver Puzzle
